Direct Digital Controls
5600 Queens Ave. NE, Suite 400
Otsego, MN 55330

THE MISSION:

To partner with individual property owners, managers, maintenance personnel, and construction firms to deliver automatic reliable control systems that conserve energy, minimize labor, and protect critical equipment by providing efficient designs in cost and function from the customer's perspective.

THE COMPANY:

Direct Digital Controls specializes in Building Automation, with 98% of our company revenue coming from the design, engineering, installation and service of automation systems. As a highly specialized company, we offer experience and expertise that is unequalled. We have been providing automation solutions since 1985 for customers primarily in Minnesota, with some customers in South Dakota, Wisconsin, Ohio and Nebraska.

MICHAEL DAY President

Specializing in design build projects and responsible for the pricing, design, layout, sequence, and programming design of Energy Management Systems.

JEFF SCHWARTZ Director of Sales

Responsible for sales and marketing of Energy Management Systems, as well as customer satisfaction.

NATHAN THOMAS Sales Engineer

Responsible for assisting Mechanical Engineers with the design of Energy Management Systems and sequences of operation as well as tracking and estimating of 'plan and specification' projects.

JEFF BERGSTEN Technical Manager

Manages the installation, programming, and commissioning of Energy Management Systems. Jeff is the primary project manager who has the responsibility of directing technicians in project design and programming.

JEFF ARMBRUSTER Service Manager

Maintaining the satisfaction of our customers and the efficient operation of their Energy Management Systems. Emphasizing the proper control sequence of Mechanical Equipment for efficient operation.

DAVE MEEMKEN Installation Manager

Master Electrician directing our licensed crews to provide on-time, professional installations.
